

## Large Diameter Universal Tied Expansion Joints

KLINGER Turkey designed and manufactured DN1200 and DN1300 expansion joints for 9 barg, DN2300 expansion joint for 3.5 barg. All units come with stainless steel liners and rods with conical washers.

## DN2400 Expansion Joints for Steel Industry

KLINGER Turkey supplied DN2400 expansion joints in a 2 gimbal 1 hinge system for a major steel factory. Bellows and liner is manufactured from Alloy 625 (2.4856) and balance of materials is P265. Alloy 625 has superior resistance to a wide range of corrosive environments of unusual severity. It is an excellent choice for sweater applications and has high tensile strength. It is resistant to chloride-ion stress-corrosion cracking.
